EXPERIENCES

Data Scientist

Huawei

JUN 2021 — Present Helsinki

- Performing R&D in computer vision and machine learning.
- Object detection, recognition and Tracking in Fashion Industry: Yolo, detectron,...
- Research in Optical Character Recognition OCR by using Convolutional Recurrent Neural Networks CRNN and CTCLoss for Latin and other complex languages. Results are better than the tesseract.

Data Scientist

Data Bid Machine

FEB 2020 — JUN 2021 Online

- Data Bid Machine is a Deep Learning AI technology company focused on improving PPC Search Advertising performance. The company's technology amplifies the power of marketers' programs by helping them substantially expand and elevate the volume of relevant, highly performant keyword optimization strategies by 10-50
- Extracting top keywords using NLP models such as BERT, Roberta,... from the product description and competitor's content.
- Classify new keywords by relevance using classification models.
- Gathering keywords recommendations by using google autosuggestion.

Data Scientist Mentor for Kaggle's BIPOC Grant

Kaggle

FEB 2021 — JUN 2021 Online

- Helping grantees to build their data science project portfolio.
- Create an exploratory data analysis, shared code/model, participation in a Kaggle competition, a medium post, a YouTube video, etc.
- Define a project (or projects) to tackle, and the grantees will spend 3 months with my mentor working towards producing a tangible deliverable/project that brings them closer to their career aspirations.

Data Scientist Competitor

Kaggle

JAN 2017 — Present Online

- Competitions Expert. Highest Rank 805 over 150k scientists.
- Kernels Master. Highest Rank 48 over 150k scientists.

EDUCATION

Master's degree M2 in Smart Systems

National School for Computer Science

Sep 2018 – Feb 2020

Master's degree M1 in Multimedia and decision-making

Higher Institute of Multimedia Arts of Manouba ISAMM

2017 – 2018

Bachelor's degree in Computer Science

Faculty of Sciences and Technology in Sidi Bouzid

2014 – 2017

PROJECTS

A Hybrid Approach for Fake News Detection on Twitter Based on User Features and Graph Embedding

- We tried to find out, source of fake news on online social networks by analyzing the users' profile and the interactions a user makes in a social network graph (followers, followed by) which gives him a social context.

Identify toxicity comments across multiple languages

- The objective is to identify toxicity comments across multiple languages.

Predict the laboratory of origin for plasmid DNA sequences

- The goal is to create an algorithm that identifies the most likely lab-of-origin for genetically engineered DNA.

Multiscanner normative age and assessments prediction with brain function, structure, and connectivity

- The objective is to predict multiple assessments plus age from multimodal brain MRI features.

Breast Cancer Detection and Classification Using Convolution Neural Network CNN

- The primary objective of our end-of-study project is to explain a complicated medical task and allow doctors to distinguish if a tumor is benign or malignant using convolution neural networks based on the Tensorflow library as our tool.

- Discussions Expert. Highest Rank 80 over 170k scientists.

Data Scientist Researcher in Social Network

RIADI Laboratory - ENSI

Mar 2019 — Feb 2020 Tunisia

- Creating a hybrid Approach for Fake News Detection in Twitter based on User Features and Graph Embedding.

ACHIEVEMENTS

- My first research paper: "A Hybrid Approach for Fake News Detection in Twitter based on User Features and Graph Embedding" (26 citations).
- Top 6% in TReNDS Neuroimaging competition on kaggle.
- Top 8% in Jigsaw Multilingual Toxic Comment Classification (NLP) competition on kaggle.
- Top 8% in SIIM-ISIC Melanoma Classification competition.
- Top 9% of competitors in the Genetic Engineering Attribution Challenge hosted by DrivenData and altLabs.
- Top 23% in M5 Forecasting - Accuracy competition on kaggle to estimate the unit sales of Walmart retail goods.
- Qualified for African-Arab Collegiate Programming Contest ACPC in Egypt 2019.
- 14th place in Tunisian Collegiate Programming Contest TCPC 2019 and second place in Manouba CPC 2019.

CERTIFICATES

- Machine Learning and Advanced Machine Learning with TensorFlow on Google Cloud Platform Specialization from Google
- Deep Learning and Natural Language Processing Specialization from deeplearning.ai

TECHNICAL SKILLS

- Python (Matplotlib, Pandas, NumPy, Scikit-Learn)
- ML (Pytorch, Tensorflow, Keras, XGBoost, Random Forest)
- NLP (NLTK, Gensim, spaCy)
- Dash Framework
- SQL, BigQuery
